HSC BOARD

INTERNSHIPS

ELITE SOFTWARES, PUNE (6 WEEKS)   **Dec 2022 – Jan 2023**

FRONT END DEVELOPER INTERN

- It was a six months internship where I worked on front end of the website.
- Used HTML, CSS, JAVASCRIPT for creating a web pages.
- Developed back end for web applications using Python framework which is Django.

PROJECTS

CRICKET DATABASE MANAGEMENT SYSTEM

- Used HTML, CSS, JAVASCRIPT, MYSQL, PHP, BOOTSTRAP to make cricket database management system project. It is a website with a user-friendly interface, team administrators can add player profiles, update their information, and track their performance statistics.
- The website also includes a feature to display the top players from each team, allowing users to easily identify the key performers and follow their progress throughout the season.

CAR SELLING AND REPAIR WEBSITE

- Used HTML , CSS, JAVASCRIPT , MYSQL, PHP to make car selling and repair website.
- The car selling and repair website is a one-stop platform that allows users to browse and purchase new or used cars, as well as access a range of automotive repair and maintenance services.
- Users can explore a wide selection of vehicles, read detailed descriptions and specifications.

REGISTRATION LOGIN

- Used Django , HTML5, CSS, Python to make registration login app.
- The registration login app made using Python and Django is a web application that enables users to create accounts, login and logout. The signup features allows users to register by providing their email address, username and password.
- After registration, users can use their credentials to log in securely. Additionally, the app includes a logout option to securely end the user's session and protect their account.

SKILLS AND INTERESTS
